CIAM Delegates
C/O: Antonis Papadopoulos
CIAM President

Dear CIAM Delegates,

Re: Introduction to Tyson Dodd – Nominee for CIAM Technical Secretary

Important particulars

Age: 42

Language: English

Residence: gold coast Australia

Thank you for the opportunity to nominate for the CIAM technical secretary roll. I have been an Aero modeler since 1990, a son of an Aeromodeller and now the father of two Aeromodellers.

From May 2018 to October 2021, I was the Model Aeronautical Association of Australia Secretary and the Australian CIAM delegate. This role entailed a high level of knowledge across all competition disciplines and involvement in Technical Subcommittee meetings at Plenary. Following 20 years of active aeromodelling administration in club, state, and national roles I not only have the support but the desire so be actively involved within our aeromodelling community in the Technical Secretary role which will allow me to provide back to CIAM and its members the historical knowledge I have gained to date.

Being Australian and located in the same time zone will allow with ease access to the previous Technical Secretary for specific questions and guidance to continue the historical stability of the roll. My previous roles and interest have afforded me the exposure all competition disciplines inclusive of F1 to SM and UAV's.

I am currently self-employed as an engineer with a focus on accuracy and have two children still at school which provides me the ability to be able to allocate the necessary time required this role deserves for at least the next 8 years.

Thank you again for the opportunity for this role and I certainly look forward to enjoying all facets of my aeromodelling including this role if elected.

Kindest regards

Tyson Dodd
