

Supporting Data: An example design of an S2/P model is shown below. The model includes a larger motor, a bay to carry a fragile payload, and accommodation for an electronic altimeter. More advanced models might include additional electronics to provide precision control of altitude and duration.

The S2/P event was flown at the 2013 Capitol Cup in Manassas, Virginia USA. Some of the competitors and their models are shown in the photo below. A wide variety of designs were entered. The S2/P event was well received by the competitors.
