

NATIONAL REPORT OF CYPRUS TO CIMP-JUNE 2008

1. In my report last year I stated that Cyprus would soon become a full and mutually recognized member of the JAA regulatory system. The last audit by JAA took place at the beginning of this year and their final report is expected.
The DCA appointed a specialist cardiologist to the position of the AMS.
2. Less pilots taking part in airports activities due to regulations and high prices of fuel and insurances.
3. The new airports centre near the capital Nicosia remains in dispute due to legal formalities and its completion is doubtful.
4. One fatal accident with a microlight, involving a British citizen occurred by the end of May. The accident is under investigation, structural failure of the microlight is not excluded.

Dr Phivos Christofides

Delegate for Cyprus
